STRATASYS F 370 PRINTER

The Stratasys F370 is the top of the line printer in the F123 series. It supports a build size up to 14" x 10" x 14" and it includes support for PC-ABS Materials in addition to PLA, ABS-M30, and ASA. The F370 has four material spool bays in an easily accessible drawer on the front of the printer. Two of the spool bays are used for the print materials and the other two are used for support materials. Insight prepares your CAD program's STL output for 3D printing by automatically generating support structures and extrusion paths. This can decrease your print time and cost, and it increases accuracy.

FEATURES

Technology	:	FDM
Print size metric	:	355mm x 254mm x 355 mm
Print size imperial	:	14 x 10 x 14 inches
Layer thickness	:	13 - 33 Microns
Connectivity	:	LAN, TCP/IP, Wireless
Software	:	GrabCAD Print
Power requirements	:	200–240V/7A. 50/60 Hz
Materials	:	ABS, PLA, ASA & PC-ABS
